Week 1 Task 2 Report

Prepared by : Zainab Bibi

Submitted to : Ali Haider

HTML Basic Tags Practice:

<!DOCTYPE html>

- For declaring the document type and version of HTML.Helps browsers render the page correctly.

2. <html>

- For the root element of every HTML document.All HTML content is written inside this tag.

3. <head>

- Contains metadata and non-visible elements like <title>, <style>, and <meta>.

4. <title>

- For setting the title of the web page, shown in the browser tab.
- Example: <title>My First Webpage</title>

5. <body>

- Contains all the visible content of the web page such as text, images, links, etc.

6. <h1> to <h6>

- Represent headings.
- <h1> is the largest and most important heading; <h6> is the smallest.
- Used to organize content and improve readability and SEO.

7. <p>

- Defines a paragraph of text.

- Automatically adds some spacing before and after.

8. `<br>`

- Line break tag.
- Used to break the line without starting a new paragraph.

9. `<hr>`

- Horizontal rule.
- Draws a horizontal line to separate content sections.

```html
<> day2.html > </> html > </> body > </> p
1   <!DOCTYPE html>
2   <html>
3   <head>
4     <title>My First Webpage</title>
5   </head>
6   <body>
7
8     <h1>Zainab</h1>
9     <h2>Zainab</h2>
10    <h3>Zainab</h3>
11    <h4>Zainab</h4>
12    <h5>Zainab</h5>
13    <h6>Zainab</h6>
14
15    <p>Hey! I am Zainab.I like to Read novels and cooking is my hobby.I want to
16      be a software engineer in future.</p>
17    </p>
18
19    <br> <!-- Line Break -->
20
21    <p>This is another paragraph after a line break.I am currenlty in 4th semester of bsse.</p>
22
23    <hr> <!-- Horizontal Line -->
24
25    <p>Paragraph after horizontal line.</p>
26
27  </body>
28  </html>
29
```
